Energy Storage i New Energy Company

Overview

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Where will a new battery energy storage system be installed in Australia?

The new system was designed in collaboration with Private Energy Partners, a Quinbrook affiliate. It will be deployed at multiple sites across Australia. These include Brisbane's Supernode, the country's largest battery energy storage campus.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Should energy storage be removed from energy grid connection?

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.

Energy Storage i New Energy Company

Sunrise New Energy Announces Hard Carbon Composite ...

DOVER, USA, Dec. 10, 2025 (GLOBE NEWSWIRE) -- Sunrise New Energy Co., Ltd. ("Sunrise", the "Company", "we" or "our") (NASDAQ: EPOW) today announced that its ...

Sunrise New Energy Announces Hard Carbon Composite ...

12 hours ago Sunrise New Energy (NASDAQ: EPOW) announced that its subsidiary published a patent titled "Spherical Hard Carbon Composite Material and Its Preparation Method" ...
