What is liquid-cooling energy storage system?

LIVOLTEK BESS Liquid-Cooling Energy Storage System adopts an “All-in-one” design concept, integrating high-capacity batteries, high-performance PCS, intelligent iEMS and BMS into a single unit. It is easy to deploy and scale, making it suitable for industrial parks, commercial complexes, and other grid-connected or off-grid applications.

What makes ESA a safe & reliable energy storage system?

Engineered for safety and reliability, the system features multi-layer protection from cell to cabinet, delivering stable and secure energy storage across diverse applications. The ESA all-in-one system is engineered with six-level active and passive fire protection, delivering comprehensive safety across every layer of the system.

How much power does livoltek p125x261e/u have?

The new model, designated BESS-P125X261E/U, provides 125 kW of nominal power and 261.2 kWh of total energy capacity. The Livoltek system, of which the company is part of Hexing Group, uses liquid-cooled, lithium-iron phosphate (LFP) battery packs with 314 Ah cells.

What is the energy density of gw125/261-esa-lcn-g10?

With an impressive energy density of 177.6 kWh/□, it delivers powerful performance while minimizing space requirements—ideal for commercial and industrial environments where footprint matters. GW125/261-ESA-LCN-G10
