Eos120 solar container battery

Overview

How many battery modules are in a EOS cube?

Shipped ready for deployment, our Eos Cube comes with all battery modules, electrical equipment, and the BMS pre-integrated into a standard 8 x 16-foot outdoor-rated shipping container. Each Cube is loaded with 672 Eos Z3™ battery modules—the current generation of our zinc-powered Znyth™ technology. Designed to meet a wider range of needs.

Are EOS batteries recyclable?

As all components used in Eos zinc-powered batteries are fully recyclable in standard facilities, the residual value of our Cube systems can reach up to 30% of the original cost of materials, making end-of-life disposal activities cost-neutral. The future is even more powerful.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is the EOS cube?

The Eos Cube—powered by our aqueous zinc batteries, built using a modular racking design, and coupled with our proprietary Eos Battery Management System (BMS) and a full suite of support services—has been purpose-built to meet the wide range of customer needs in an increasingly decentralized, democratized, and decarbonized energy ecosystem.
