**Equip yourself with outdoor
power at home**

Overview

How can I save energy during a power outage?

Set up battery-powered LED lights and phone/laptop chargers to use during outages. Maintain a supply of propane, gasoline, or diesel to run backup generators when needed. Consider adding more solar panels or wind power if outages are frequent. Develop a mindset of conserving power and being energy-efficient.

What are the best energy options for off-grid?

This is because their scalability and solar power are often the top choices for off-grid energy. What are the best power options for off-grid?

The ideal choices include a mult-source system, including solar panels, wind turbines, and backup generators. Mix them up based on your location's resources.

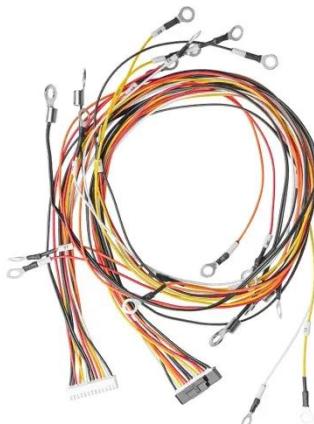

How do you prepare for a power outage?

Be prepared for power outages. Have flashlights, battery-operated lamps, warm blankets, and ways to prepare food without electricity. Adjust your energy usage habits to be energy-saving — turn off lights when leaving a room, moderate thermostat temperature, and use power sparingly during low sunlight or low wind days.

Is generating your own electricity a good idea?

Making the transition to generating your own electricity can be challenging at first. But with some preparation and knowledge, it can also be a rewarding experience that provides cost-effective energy independence. Get a complete home renewable energy system walkthrough from the previous homeowner or builder.
