Exchange of Lebanese Folding Containers for Aquaculture Industry

Overview

How many countries export fisheries & aquaculture products in 2020?

In 2020, 225 states and territories reported some trading activity of fisheries and aquaculture products. World exports of aquatic products, excluding algae, totalled 59.8 million tonnes live weight, worth USD 151 billion.²⁷ This represents the second consecutive decline, down from the record high of USD 165 billion reached in 2018.

How does aquaculture differ from capture fisheries?

In addition to the production process itself, aquaculture differs from capture fisheries in many fundamental ways, including business and industry structure, inputs, risk factors, environmental impact and infrastructure requirements. Each of these differences has implications for the dynamics and development of global trade.

How important are trade statistics for fisheries & aquaculture products?

SOURCE: FAO. Traded fisheries and aquaculture products are diverse in terms of species, origin, product form, packaging and method of preservation. This creates challenges for gathering consistent and accurate trade statistics while underlining the importance of such statistics to understand a complex marketplace.

Are aquaculture products industrial goods or non-agricultural goods?

Aquatic products are classified as industrial goods by the WTO, meaning they are grouped under non-agricultural market access negotiations. Under the WTO principle of most-favoured nation, applied tariffs for fisheries and aquaculture products range from 0 percent to 30 percent, with an average of 14 percent (FAO, 2017b).
