# **Factory price battery storage in Vancouver**

## Overview

---

Are EV batteries getting a new life as stationary energy storage?

EV batteries are getting a new life as stationary energy storage in North America, as Moment Energy's factory comes online. Canadian battery storage startup Moment Energy has begun full-scale manufacturing at its Metro Vancouver facility, producing modular battery energy storage systems (BESS) built from retired electric vehicle (EV) batteries.

What is moment energy's second-life battery energy storage system (BESS)?

Image: Moment Energy Moment Energy's second-life battery energy storage system (BESS) manufacturing hub in Vancouver, British Columbia, Canada, has reached full-scale production. The facility produces Moment's Luna BESS, a 400kWh/1MWh unit that can be scaled into 10MWh that uses repurposed second-life electric vehicle (EV) batteries.

How many vanadium flow batteries can invinity produce a year?

Above: Guests attending the open day Expanded in a short space of time in response to the fast-growing demand for Invinity's alternative to lithium-ion batteries for energy storage projects, the Company's Vancouver facility is now able to produce up to 200 MWh of vanadium flow batteries per year.

Does invinity energy systems have a warehouse in Vancouver?

At first glance, the East Vancouver facility of Invinity Energy Systems seems a little empty. High ceilings, nondescript white walls and sturdy grey floors with enough space to comfortably house 15 cars come together to paint the picture of a warehouse yet to be filled.
