Overview

Is Bess a solution to grid imbalances in Greece?

Over the past five years, Greece has been steadily refining its energy storage policies, recognising BESS as a critical solution to increasing grid imbalances between supply and demand.

How many MW of Bess are there in Greece?

As of early 2025, Greece has approximately 100 MW of operational BESS, comprising a small number of FTM (front-of-the-meter) projects and pilots developed prior to the 2023 tenders. Several additional systems became operational in 2024, but the bulk of large-scale storage capacity remains under development.

How much does a Bess system cost?

With BESS system prices being high today (with costs for Lithium-Ion BESS ranging from 550.000 EUR/MW to 650.000 EUR/MW for the future. The augmentation or repower plan strategy to be followed by the investor will greatly influence the commercial assessment both in terms of costs and revenues.

Will raaey support Bess in Greece?

The first such tender for award of CAPEX and OPEX support to BESS organized by RAAEY, is a critical step for the deployment of the first utility scale BESS in Greece. 95 offers in total have been received amounting to approximately 3.3 GW, which contest the 400 MW quota of this first phase.
