# **France retrofits solar air conditioner**

## Overview

---

How much does a solar AC retrofit cost?

With the 30% federal tax credit and many state rebates, a solar-AC retrofit often pencils out as the most cost-effective HVAC upgrade you can tackle, especially in hot, sunny regions where peak rates bite. SRECs or PV rebates: \$0.20-\$0.75/W in NJ, MA, IL, CO. Battery rebates: \$300-\$1 000/kWh in CA, NY, HI.

Are France's attitudes towards air conditioning changing?

In France, attitudes towards air conditioning are changing. Just 14 percent of homes had air conditioning in 2016. Four years later, a quarter had installed the cooling system, according to the governmental Agency for Ecological Transition. Despite its rising popularity, the use of air conditioning is still a source of debate.

Is a solar retrofit right for Your House?

Solar-powered air conditioning is finally practical: a handful of PV panels, a DC-inverter mini-split, and the 30% tax credit can reduce your hottest-hour electricity use by half, often for under \$ 8,000 in parts. This guide breaks down the numbers and the know-how so a DIYer can decide, “Is a solar retrofit right for my house, roof, and budget?

”.

How do I know if a solar-AC retrofit is right for me?

Commission: Check PV amperage, verify cooling, and file permit close-out. With the 30% federal tax credit and many state rebates, a solar-AC retrofit often pencils out as the most cost-effective HVAC upgrade you can tackle, especially in hot, sunny regions where peak rates bite.
