French solar conductive glass

Overview

What is transparent electrically conductive glass for solar cells?

Transparent Electrically Conductive Glass for Solar Cell A key growth area is the use of NSG's online coatings as a key component for future technologies. Development of NSG TEC[™] (Transparent Electrically Conductive Glass) range allows glass to act like an invisible wire.

Which solar glass products are suitable for thin film photovoltaic technology?

Range of coated solar glass products designed for thin film photovoltaic technologies, including a comprehensive choice of TCO glass (Transparent Conductive Oxide coated glass) products with haze and conductivity levels optimised to suit each specific thin film photovoltaic solar technology, also available on low iron glass.

Are tec15 glass plates conductive?

The FTO- coated glass plates are ideally suited as glass substrates for perovskite devices and dye sensitized solar cells (Abd Mutalib et al., 2022; Hiltunen et al., 2022). The sheet resistance of the conductive coating in TEC15 glass plates is approximately 15Ω/sq. Glass plates over 5 sheets pack are available but freight costs will vary.

What are solar glass products?

Available with added functionalities, such as transparent conductive coatings or anti-reflective coatings, our solar glass products not only offer durable transparent protection to solar panels, but also become a functional component of solar modules.
