Gaborone s new solar panels

Overview

How will Botswana Power Projects be implemented?

These projects, with a combined capacity of 1.5GW, will be implemented through private sector investment, with the Botswana Power Corporation (BPC) acting as the offtaker under long-term Power Purchase Agreements (PPAs) of up to 25 years.

How many solar projects are planned in Maun & Letlhakane?

Initially, two large-scale projects were planned; a 200MW concentrated solar power plant in Maun and a 100MW solar photovoltaic (PV) project in Letlhakane. Instead, the government has opted for Maun Solar PV (500MW), Letlhakane Solar PV (400MW), Isang Solar PV (400MW), and Mmadinare Solar Project (100MW).

How much does LCOE cost in Gaborone?

The levelized cost of energy (LCOE) of the projects will range between \$0.08 and \$0.10/kWh. The projects will be located in areas like Gaborone, Ramotswa, and Lobatse. The names of the other off-takers will be disclosed once the PPAs are signed.

How much shareholding does Botswana need to invest in solar?

“Utility-scale projects by foreign private sector entities require at least 40% mandatory shareholding by Botswana citizen-owned companies. However, small-scale solar PV investments are reserved for 100% citizen-owned companies,” Kenewendo added.

Gaborone s new solar panels

Botswana's solar energy plans take shape - YourBotswana

To support small-scale solar initiatives, the government said it continued to implement its rooftop solar programme for domestic, commercial, and industrial consumers, ...

P1.6 billion Mmadinare 120 MW Solar Project ...

The 120 MW Mmadinare Solar Cluster, located near the copper mining town of Selibe-Phikwe and over 200 kilometres from the ...
