# Garden Solar Prices and Wattage

## Overview

---

How much do garden solar panels cost?

Garden solar panels function like traditional solar panels but are ground-mounted instead of roof-mounted and placed in your garden. They are typically more expensive than regular solar panels, costing approximately £11,700 for a 4kW system, but can help you save £1,304 annually on electricity costs.

How much does solar cost per kWh?

Let's play "Price Per Watt" showdown: But wait - solar's real magic happens after installation. While fossil plants have fuel costs, solar's "fuel" is free. Over 30 years, solar's levelized cost drops to \$0.02-\$0.04/kWh, beating even natural gas in sunny regions.

Do garden solar panels save money?

For example, a 4kW solar system installed in a garden can save around £1,304 annually, which translates to approximately £16,500 in savings over 25 years. These substantial savings make garden solar panels an attractive option for UK homeowners looking to reduce their energy costs and embrace renewable energy.

How do I choose a solar panel for a garden?

When choosing solar panels for gardens, similar considerations to roof-mounted systems should be made, such as solar panel efficiency, optimal performance, and meeting specific criteria. For a garden to be suitable, it should receive at least 4 hours of direct sunlight per day, as shaded areas may not be ideal.
