Georgia Valley Power Energy Storage Equipment Manufacturer

Overview

Who sanctioned battery energy storage systems in Georgia?

The systems are sanctioned by the Georgia Public Service Commission through the Integrated Resource Plan. Credit: Georgia Power. US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the state of Georgia, totalling 765MW capacity.

What is mossy branch battery energy storage system?

US utility Georgia Power has brought online its 65-MW/260-MWh Mossy Branch battery energy storage system (BESS), which is expected to improve the resilience of Georgia's electric grid. Located near Columbus, in Talbot County, the BESS will be operated as a standalone unit.

Is Georgia Power planning a 265 MW battery storage project?

Currently, Georgia Power is working on a 265-MW battery storage project, which it plans to commission by end-2026. A few months ago, it picked the locations for four BESS projects with a total capacity of 500 MW.

Where is the mossy branch power plant located?

Located near Columbus, in Talbot County, the BESS will be operated as a standalone unit. It will connect to and charge directly from the electric transmission grid, offering four hours of storage capacity, according to a report by Renewables Now. The Mossy Branch project was cleared by the Georgia Public Service Commission in 2021.
