

BLINK SOLAR

Georgia solar double glass module manufacturer

Overview

DAS Solar has announced the launch of its n-type bifacial double glass module in Georgia and a collaboration with local distributor Innovation Energy. Will a new solar glass plant in North Georgia create a strong supply chain?

“SOLARCYCLE’s announcement of hundreds of jobs coming to a new, cutting-edge solar glass plant in North Georgia further cements the Peach State as a national leader in domestic solar manufacturing, and they will play a pivotal role in creating a robust supply chain for the United States emerging solar footprint.

When will solarcycle start manufacturing glass?

The plant, which will be the first of SOLARCYCLE’s facilities to manufacture glass in addition to recycling solar panels, is scheduled to begin construction in 2024 and will be operational in 2026. SOLARCYCLE will create full-time jobs in manufacturing, engineering, management, research and design, and support staff.

Where is solarcycle based?

SOLARCYCLE currently operates facilities in Odessa, Texas and Mesa, Arizona – and has inked long-term partnerships with more than forty of the nation’s largest solar energy companies to reuse and recycle their solar panels including Georgia-based solar manufacturer Qcells.

Can solar glass make c-Si photovoltaics?

SOLARCYCLE’s new facility in Georgia will position the company as one of the first manufacturers of specialized glass for crystalline-silicon (c-Si) photovoltaics in the U.S., with the capacity to make five to six gigawatts worth of solar glass every year.
