

BLINK SOLAR

Guatemala City Wind Power System Brand

Overview

What is a wind power project?

The wind project will generate electricity from a clean, inexpensive source of energy that is renewable. The wind power project consists of installing sixteen wind turbine generators for a total capacity of over 55 MW. The site is expected to provide 135,000+ GWh per year to the Guatemalan National Interconnected System.

What is San Antonio El Sitio wind power project?

San Antonio El Sitio Wind Power Project is the first wind project located in the Guatemalan region. This project was executed by a Guatemalan firm, Eólico San Antonio El Sitio, and deploys sixteen 3.45 MW units of wind Turbine Generators for an annual average of 135.655 GWh of green electricity to the regional grid.

What makes IPS the largest capacity provider in Guatemala?

Modernize. Empower. This is how IPS serves as the largest capacity provider for Guatemala, staying committed to creating efficiencies and pushing sustainability at every turn. In 2021, International Power Services acquired legacy plants in Esquintla and Puerto Quetzal.

Who is IPS Guatemala?

In 2021, International Power Services acquired legacy plants in Esquintla and Puerto Quetzal. Since then, IPS Guatemala has been dedicated to providing power to Guatemalans, constantly striving for innovation and sustainability at every step. IPS Guatemala has a generating capacity of 460 MW through our assets across Puerto Quetzal and Esquintla.
