## Overview

---

What is a 5MWh energy storage system containerized?

The 5MWh energy storage system containerized is a intelligent monitoring and high protection level, and is suitable for a variety of complex scenarios to meet the energy storage needs of the industrial and commercial sectors, the electric power grid, and renewable energy. The 5MWh energy storage system container consists of 12 energy storage units.

How many energy storage units are in a 5MWh energy storage system?

The 5MWh energy storage system container consists of 12 energy storage units. A single energy storage unit is made up of 1 lithium battery cluster. Due to their high capacity and small size, 3.2V/314Ah lithium batteries make excellent energy storage containers and designs. Each battery cluster is comprised of 4 battery boxes and 1 high-voltage box.

How many battery clusters are in a solar power system?

It contains 14 battery clusters of 358.4kWh each (1280V @ 280Ah), two 1.25MW energy storage inverters (PCS), and all necessary components including DC combiner cabinets, MV switchgear, local communication and EMS cabinet, fire suppression, HVAC, lighting, and power systems.
