Hanoi 200kw off-solar container grid inverter

Overview

What is an off grid solar power system?

On Grid Solar Power System Off grid solar power system doesn't connect to the power grid. In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter.

What is the output voltage of grid off inverter?

The output voltage can be set between -40 % to +20 % of rated voltage. And the output voltage of grid off inverter is very accuracy $\pm 1\%$. Off grid solar power inverter often used in electric vehicle and train system. 200kW pure sine wave inverter without battery for solar power system, three phase, converts DC power to AC power.

What is a solar inverter?

The solar inverter is mainly a solar panel that receives solar energy and then converts it into electric energy through an inverter. Generally, only those areas with abundant sunshine will recommend solar power generation equipment.

What is an off grid inverter used for?

This off grid inverter is widely used for solar energy, wind turbine, and other renewable energy systems, also suitable for use in the mountains, pastoral, border, islands, vehicles, ships, and other areas without electricity which can provide and guarantee effective power supply.
