How efficient are solar panels?

While the most efficient solar panel for residential use sits at 22.8% efficiency, scientists have discovered a few technology advancements that have gotten solar panels to around 90% efficiency (but they convert sunlight to heat, not electricity) in a lab setting. This was first done in the early 2010s at the University of California in San Diego.

What is the most efficient solar panel?

The most efficient solar panel available for homes today is Maxeon's 440-watt panel at 22.8% efficiency. Solar panel efficiency is the percentage of incoming sunlight that a single solar panel can convert into electricity. Maxeon, Qcells, Solarever USA, Canadian Solar, and REC currently offer the most efficient solar panels on EnergySage.

How efficient are solar panels in 2021?

According to the Lawrence Berkeley National Laboratory's Tracking the Sun report, 2021 was the first year more than half the residential solar panels installed in the US had efficiency ratings above 20%. Ten years ago only 0.6% of those installed reached that mark.
