# High quality wiring a breaker in Spain

**215kWh**

8,000+ Cycles Lifetime

IP54 Protection Degree

## Overview

---

Does electrical wiring really matter in Spain?

No you don't as Electrical wiring in buildings bears no resemblance to household wiring in the UK or here in Spain. Take that from someone who did both 3 phase 600A in factories and house wiring to 15th edition a few years ago. None of that however matters here in Spain.

What is a circuit breaker?

The circuit breaker (CB) is a control element that automatically switches off the electrical installation when there are several devices operating at the same time and they exceed the power you have signed up for. According to current regulations (article 10 of RD 1454/2005) it is compulsory to have this circuit breaker in homes.

How does electrical installation software work in Spain?

The software considers overcurrent and short-circuit protections, cable sizing according to the power balance of the installation, calculated in real-time from the single-line diagram. For every electrical installation designer in Spain, installation is assured to be safe and compliant.

How safe is electrical installation in Spain?

For every electrical installation designer in Spain, installation is assured to be safe and compliant. A DC (direct current) module is available in elec calc <sup>™</sup> for sizing parts of installations supplied by rectifiers, batteries, and rectifier/battery assemblies.
