Himel circuit breaker factory in Austria

DISTRIBUTED PV GENERATION + ESS

Overview

How does Himel air circuit breaker work?

Himel air circuit breaker automatically interrupts the current flowing through it when the current exceeds the trip rating of the breaker. Air is the medium of electrical insulation between electrically live parts and grounded (earthed) metal parts. [Catalog | Technical Specification: Download Catalog Request for Quotation.](#)

Where is Himel made?

HIMEL's main production site is located in Melchingen, Swabia, south of Stuttgart.

How does Himel operate?

Himel works in project-based working groups at networked CAD and CIM workstations. The team of motivated and technically competent employees makes Himel not only a manufacturer of feed preparation systems, but also a competent partner for all aspects of feeding technology.

Who runs Himel?

The traditional family business has been run by the sons of the company founder, Werner and Martin Hirlinger, since 1999. With the handover of the company, two competent and committed successors have taken the helm, who will continue to consolidate HIMEL's position on the international market in the new millennium.

Himel circuit breaker factory in Austria

HIMEL AIR CIRCUIT BREAKER (ACB)
