## Overview

---

Does London Underground have 5G?

London Underground lines are at various stages of having this installed. The Elizabeth line now has service from all of its stations. These are all covered by 4G, with tunnel sections now covered by 5G. And now a new portion of the Northern line has mobile phone coverage.

Which stations have 4G & 5G?

Elizabeth line- All stations now have 4G and tunnel sections now have 5G.

Bakerloo line - Mobile coverage is available at Piccadilly Circus station.

Northern line - Mobile coverage available from Highgate station and Hampstead station to Embankment station on the Charing Cross branch.

Does 3 5G work underground?

Yes, Three's 5G network can get you connected across a range of London Underground stations. We're developing our London Underground coverage so that by the end of 2024, our combined 4G and 5G network will cover you across all Tube stations and tunnels. Does 4G work underground?

Will London Underground be able to use 4G?

Billy D'Arcy, CEO of UK & Ireland at Boldyn Networks, said: "With all Elizabeth lines stations now offering 4G mobile coverage, this milestone shows the rapid progress of our work to deploy connectivity across the London Underground.
