How much does a square meter of solar panels on a house roof cost

Overview

How much does a solar system cost for a 3,000 square foot home?

The average pre-incentive cost of a solar system for a 3,000 square foot home was \$30,100 based on thousands of sales conducted on solar.com in 2022. The number of panels in these systems depends on the price point from the installer and power rating of each panel. The table below shows a few common scenarios for a 3,000 square foot home.

How much does a solar roof cost?

For example, Tesla Solar Roof costs around \$75,000 for a complex design. However, if you have a smaller home or want to install only a few integrated solar shingles, you might be able to finish your project for as little as \$15,000, with all fees included. A solar roof can save you money on your energy bills, so you recoup the cost in the long run.

How much does a solar system cost?

A solar system for a 2,000 square foot house costs, on average, \$29,200 before incentives and around \$20,500 after the 30% tax credit. That's a rate of \$10.32 per square foot of living space. If your home is closer to 1,750 square feet, you can expect the pre-incentive solar system cost to be between \$27,500 and \$29,200.

How do I calculate a solar roof area?

Enter Panel Efficiency (%): Input the efficiency rate of the solar panels, usually provided by the manufacturer. Enter Solar Irradiance (W/m²): This value is the average solar power received per unit area, typically based on location. Once all fields are filled, click the "Calculate" button to receive the required roof area.
