# How much does energy storage power cost in the UK

## Overview

---

**Cost per kWh:** The price per kWh of storage generally ranges from £265 to £415. How much does a solar battery cost in the UK?

**Financial Considerations:** As of 2025, solar battery prices in the UK range between £2,500 and £10,000, depending on capacity and technology. When combined with solar panels, a typical three-bedroom home could save approximately £582 annually, with the battery contributing around £130 of that saving.

How many battery energy storage projects are there in the UK?

ed energy storage system. Over the past year, the number of battery energy storage projects in the UK's pipeline has increased from 239 to 338 in total<sup>9</sup>. The capacity of battery storage is also set to increase substantially as only 5% of projects in 2022 are in operation.

How much does a 10 kWh solar battery cost in the UK?

The cost of a 10 kWh solar battery in the UK typically ranges from £5,000 to £7,500, including installation when fitted with a new solar panel system. When adding it to an existing solar setup, the cost could be closer to £7,000 or more. Discover average solar battery prices in the UK.

How much does a solar battery storage system cost?

The total cost to install a solar battery storage system, including a 4kWh battery, inverter and PV system, comes in at around £12,000 on average. How long will a 10kW home battery last?

The average solar battery storage system lasts around 10 to 15 years. This is provided it's properly installed and well-maintained.
