# **How much is the Polish solar container outdoor power factory**

## Overview

---

Does Poland have a solar industry?

The solar industry in Poland is driven by government incentives, favorable solar conditions, and the country's commitment to renewable energy. With ongoing efforts to promote solar power, Poland is expected to continue its expansion in the solar industry and contribute to its overall energy transition.

How much energy does a solar PV system produce in Poland?

The average yearly energy yield from a 1 kWp solar PV system in Poland is around 1,000 kWh per year. The average kWh/kWp for different orientations (30-degree tilt) are: East: 972.57 kWh/kWp, South: 1214.39 kWh/kWp, West: 947.13 kWh/kWp. 4 The average cost of electricity in Poland, as of December 2023, is \$0.23 per kilowatt-hour.

How will Poland contribute to the energy transition?

With ongoing efforts to promote solar power, Poland is expected to continue its expansion in the solar industry and contribute to its overall energy transition. Poland has been actively working to diversify its energy mix and reduce its dependence on coal, leading to an increased focus on renewable energy sources like solar power.

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.
