Why should I set up my own RTK base station?

Setting up your own RTK base station gives you full control over your GNSS workflow, saves on subscription costs, and boosts your field accuracy. Whether you're working on construction, land surveying, or agriculture, this step-by-step guide will help you confidently set up a stable RTK base station using professional-grade equipment.

How do I power a RTK base station?

To power the base station from a power bank or PC. RTK base station has an SMA connector to connect an antenna. RTK base station does not include, but requires a good quality GPS/ GNSS antenna. RTK base station supports full L1/L2/L5 bands.

How to connect RTK base station to router?

Connect the RTK base station to your router with an Ethernet cable. 14. In the toolbar, go to Communication->Ethernet. At the Ethernet Interface Mode, check Power on. In most of the routers automatic IP is used. To work in this way, select DHCP. If you prefer to set up your local IP manually, you can also do it from this menu.

What is an RTK base station?

An RTK base station is a fixed GNSS receiver placed on a known or unknown point. It uses satellite signals to continuously calculate its position. Then it sends real-time correction data to a rover in the field. Thus, your rover can achieve maximum accuracy, up to centimeters. This practice replaces you being off by several metres using GPS alone.
