Overview

Does Huawei have a sulfide battery?

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes.

Are Huawei's claims a threat to China's battery industry?

Huawei's claims have sparked excitement and concern. Japan and South Korea, home to battery pioneers like Toyota and Samsung, fear China's rapid rise. Chinese firms now file over 7,600 solid-state battery patents yearly, claiming 36.7 per cent of global activity.

Will Huawei's new lithium-ion battery disrupt the booming solid-state battery sector?

This recent patent application, reported by CarNewsChina, signals Huawei's aim to disrupt the booming solid-state battery sector. The patent details a battery with an energy density of 400 to 500 Wh/kg, potentially tripling that of standard lithium-ion cells. Huawei's tech tackles a key challenge: electrochemical stability.

Why is Huawei pursuing solid-state battery research?

Huawei's engagement in solid-state battery research reflects a wider trend among Chinese technology and automotive companies. Although Huawei does not manufacture power batteries directly, its growing interest in upstream battery materials is notable.
