

**BLINK SOLAR**

# **Huawei Mexico solar container battery**

## Overview

---

What is Huawei 4.5mwh-2h1 storage container?

In the utility segment, the successful 2.0 MWh storage container has been systematically developed into the new Huawei 4.5MWh-2H1 storage container. The massive capacity enables flexible grid services, time-shifting of feed-in and hybrid power plant operation.

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 KWh up to 15 KWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

What is Huawei fusion solar?

Huawei FusionSolar offers scalable storage solutions across all segments: from the new LUNA2000-S1 for residential buildings to the powerful LUNA2000-215-2S10 for C&I applications and the 4.5MWh-2H1 large-scale storage system for utility projects. The systems are based on safe LFP technology and can be seamlessly integrated into PV systems.
