# **Huawei Philippines Energy Storage Container**

## Overview

---

How many GWh of battery energy storage in the Philippines?

With the latest deal, the Philippines has procured cumulative 6 GWh of battery energy storage systems (BESS) within days. China's Huawei has bagged its biggest BESS order to date and will supply the Meralco Terra Solar Project in the Philippines, which is considered the largest integrated solar and battery storage facility in the world.

What auxiliary components will Huawei provide under a Bess deal?

Under the deal announced last week, Huawei will provide its containerized BESS and essential auxiliary components such as fire suppression systems; heating, ventilation, and air conditioning; battery management systems; power conversion systems; and energy management systems.

Why should you choose Huawei intelligent lithium batteries?

Simple: IoT networking, from manual to Cloud O&M Intelligent: backup power to energy storage system Efficient: precise configuration and investment Safe: fault prediction, passive to proactive Huawei intelligent lithium batteries support AI dynamic peak staggering, evolving from backup power to energy storage systems.

Is Huawei developing a gigawatt-scale Bess project?

Huawei has already developed gigawatt-scale BESS projects with one of its flagship developments a 400 MW/1.3 GWh solar-plus-storage off-grid facility in Red Sea New City, Saudi Arabia, unveiled in September. That project is presently the world's largest operating microgrid, delivering more than 1 TWh of green electricity annually.
