

BLINK SOLAR

Huawei Romania PV Module Project

Overview

Is Romania on track for record solar deployment in 2025?

Romania is on track for record solar deployment in 2025, driven by subsidies for residential and commercial and industrial systems and a more favorable framework for utility-scale development. Romania added 900 MW to 1 GW of solar over the first six months of 2025, according to figures from the Romania Photovoltaic Industry Association (RPIA).

How many MW will Romania add to 1 GW of solar?

Romania added 900 MW to 1 GW of solar over the first six months of 2025, according to figures from the Romania Photovoltaic Industry Association (RPIA). Irene Mihai, RPIA policy officer, told pv magazine that the figure consists of 400 MW to 450 MW of residential and C&I installations and 500 MW to 550 MW of utility-scale projects.

How much solar power does Romania have in 2024?

This year's additions to date put Romania's total installed capacity at close to 6 GW, building on the country's record year for solar deployment in 2024. Mihai cited the Casa Verde Fotovoltaice, a subsidy scheme for residential and C&I installations, as a key driver for these market segments during the first half of the year.

How much solar power does Romania have?

Irene Mihai, RPIA policy officer, told pv magazine that the figure consists of 400 MW to 450 MW of residential and C&I installations and 500 MW to 550 MW of utility-scale projects. This year's additions to date put Romania's total installed capacity at close to 6 GW, building on the country's record year for solar deployment in 2024.
