Huawei solar container communication station EMS Equipment Environmental Assessment

Overview

What is Huawei doing to protect the environment?

Huawei is working closely with global environmental protection organizations, customers, and partners on projects that explore the use of ICT to protect forests, wetlands, and oceans, and increase the efficiency of biodiversity and natural resource protection and management.

Does Huawei have a centralized monitoring solution?

Huawei has rolled out a centralized monitoring solution that should help resolve these difficulties. Through in-band transmission and integrated management, the solution enables each MCU to communicate with the monitoring center, while its simplified structure eases the burdens of deployment and maintenance.

Where is Huawei's solar power station located?

In the Kubuqi Desert of Inner Mongolia, the State Power Investment Corporation used Huawei's smart PV solution to build a 300 MW solar power station. The power station located in Dalad Banner, an administrative region in Inner Mongolia, boasts 196,000 solar panels that were installed in the pattern of a galloping horse.

What is Huawei & Rainforest Connection acoustic monitoring system?

Huawei and Rainforest Connection (RFCx) are using the solar-powered Nature Guardian acoustic monitoring system, enabled by cloud and AI technologies, to help rangers identify the sounds of environmental threats in real time. This system also helps conservationists study and protect local biodiversity based on the collected acoustic data.
