Huawei solar module project in France

Overview

Does Huawei have a factory in France?

Huawei to establish its first overseas factory in France. Credit: Huawei
Huawei's deputy general manager of the French branch, Zhang Minggang, announced on December 10 that Huawei's first overseas factory will be established in France, with production expected by the end of 2025.

When will Huawei's first overseas factory be established?

Huawei's deputy general manager of the French branch, Zhang Minggang, announced on December 10 that Huawei's first overseas factory will be established in France, with production expected by the end of 2025. The construction is progressing toward the goal of manufacturing one billion devices annually and creating 500 local employment opportunities.

What is Huawei doing in France?

Instead of smartphones, this factory will produce components for 4G and 5G base stations, including chipsets and motherboards. By 2021, Huawei achieved 2.5 billion euros in sales in France, creating approximately 10,000 jobs and holding a 20% market share in France's telecommunications infrastructure market, according to the company.

Will Huawei invest in France?

The factory is part of Huawei's broader plan to invest in France, where it has been present since 2003.
