# Hybrid inverter mppt for sale in Toronto

## Overview

---

What is a hybrid inverter?

A hybrid inverter is essentially two inverters in one. It combines a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery, or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

How do I select a hybrid inverter?

When choosing a hybrid inverter, it's important to consider its capabilities and how they can be customized to suit your needs and preferences. To help you make an informed decision, consider consulting with an accredited solar and battery specialist like Jason Svarc, who has over a decade of experience in designing and installing solar and battery systems.

What is a Growatt 10kW grid tie inverter?

Power your home or business with the Growatt 10KW grid tie inverter—designed for superior efficiency, and grid tie with backup functionality. This solar on grid inverter offers seamless energy conversion.

Can a hybrid inverter work with a HV battery?

Yes, most high-voltage hybrid inverters can work with a high-voltage (HV) battery, but they are often limited to the same brand as the inverter. HV batteries generally offer more continuous and peak power per kWh, which is useful if a high backup load power is needed.
