Overview

What is TE Connectivity's battery energy storage system (BESS) solution?

TE Connectivity's (TE) Battery energy storage system (BESS) solutions, which improves power allocation flexibility in power generation, power transmission, and power consumption, help meet this increased demand for alternative energy sources.

What is the battery energy storage system (BESS) industry?

The Battery Energy Storage System (BESS) industry has experienced remarkable growth in recent years, driven by the global shift toward renewable energy and the increasing need for reliable grid stability solutions.

What is a Bess system?

Customers rely on these systems to store excess energy produced during periods of low demand or when renewable energy sources, like solar and wind, are generating surplus power. Our grid-scale BESS solutions range from 1 MWh to over 1,000 MWh as both traditional LV and JST's unique HV cascade solution.

What are the benefits of a Bess system?

For commercial and industrial applications, our All-in-One BESS solutions offer optimal peak demand management, enhanced backup power and resilience and increased power quality and reliability. Customers can also achieve energy cost savings through time of use energy rates and off-peak management.
