### What is energy storage duration?

When we talk about energy storage duration, we're referring to the time it takes to charge or discharge a unit at maximum power. Let's break it down: **Battery Energy Storage Systems (BESS):** Lithium-ion BESS typically have a duration of 1-4 hours. This means they can provide energy services at their maximum power capacity for that timeframe.

### What is a commercial battery storage system?

Our commercial battery storage systems utilize demand charge management, dynamic capacity expansion, and demand-side response to improve commercial and industrial energy storage and enhance new energy distribution. Project features 5 units of HyperStrong's liquid-cooling outdoor cabinets in a 500kW/1164.8kWh energy storage power station.

### What is a commercial and industrial energy storage system?

Product can be used in any parallel connection to meet different power and energy requirements and can be flexibly deployed on-site. A commercial and industrial energy storage system from HyperStrong reduces the cost of electricity consumption and stabilizes your business's power supply.

### How long does a battery energy storage system last?

Let's break it down: **Battery Energy Storage Systems (BESS):** Lithium-ion BESS typically have a duration of 1-4 hours. This means they can provide energy services at their maximum power capacity for that timeframe. **Pumped Hydro Storage:** In contrast, technologies like pumped hydro can store energy for up to 10 hours.
