# Installation of glass on solar panels

## Overview

---

Can you put solar panels behind glass?

One of the most common places people use solar panels behind glass is in a caravan or motorhome. Many people simply don't have the room to install panels, or don't fancy drilling a hole in the roof to fix them. However, when parked up the large windows can make a great place for a panel. How do glass windows affect this process?

.

How to install a solar panel system?

It's easy to set them in the right position, thanks to mounting kickstands. It is thus convenient to install a solar panel system using portable modules. Portable folding solar panels are another, more compact option. A battery is needed to use solar energy during the night, and a solar controller for safe battery charging.

What is solar glass?

Solar glass is a type of glass that is commonly utilized in solar panels. This glass is designed to act as a mirror and has an anti-reflective coating on one or both sides, which aids in concentrating sunlight. Solar glass provides exceptional solar power transmission and remains reliable under sunlight exposure.

Why is solar glass important?

Know the importance of solar glass that enhances the efficiency and performance of solar panel: The purpose of solar glass in solar panels is to safeguard them against moisture damage, obstruct oxygen to avoid oxidation, and enable the panels to endure extreme temperatures while maintaining excellent insulation and resistance to aging.
