Inverter 60HZ

Overview

What is a frequency inverter?

Also called Frequency Converter, it's a power conversion device running at mains power (60Hz / 50Hz). The frequency inverter converts a basic fixed frequency (50Hz/60Hz), fixed voltage (220V/380V/480V etc.) to a variable frequency (maximum frequency up to 400Hz), variable voltage (maximum voltage equal to input voltage) to control AC motor speed.

Do I need a 60Hz inverter?

Here in the US, things run at 60Hz, in Europe and most other places around the world, things run at 50Hz. You'll most likely require a 60Hz inverter if you are running a device intended to run on US power. We like to go camping and travel quite frequently.

Can a single phase inverter output 240V 60Hz?

These single phase inverters can be programmed to output 240V 60Hz for North American applications. Couple with an Autotransformer to do neutral forming for 120/240V split phase applications. We can also stack these inverters in three phase configurations to do 230V/400V WYE (50Hz or 60Hz).

What is a 1 kVA single phase 110V 60hz to 220V 50Hz frequency converter?

1 kVA single phase 110V 60Hz to 220V 50Hz frequency converter, static pure sine wave output, make home appliances rated at 220V 50Hz (e.g. China) working better at 110V 60Hz (e.g. US) power supply.
