Investors in commercial energy storage projects

Overview

What's going on with energy storage investment in 2024?

Private equity and venture capital investments in the battery energy storage system, energy management and energy storage sector so far in 2024 have exceeded 2023's levels and are on pace to reach one of the highest annual totals in five years.

Which sector has the most battery energy storage deals?

The industrial sector secured the most battery energy storage system deals, followed closely by the energy and utility sector. In the largest transaction, battery storage company NineDot Holdings Inc. raised \$225 million in a round of funding led by Manulife Investment Management Ltd., with participation from existing backer The Carlyle Group Inc.

How big will energy storage be in 2025?

Global energy storage installations are projected to grow by 76% in 2025, reaching 69 GW/169 GWh, driven by surging electricity demand, especially from electric vehicle adoption and data center expansion. The latter alone is expected to account for 44% of U.S. electricity load growth through 2028.

What's driving the energy investment trend?

"The major driving force behind this investment trend is the market itself," Mani said, citing growth in electric vehicles, increased demand from AI-driven datacenters and a growing recognition of battery energy storage systems in addressing renewable energy needs.
