Is Mogadishu making money from selling outdoor power supplies

Overview

How much energy does Mogadishu use?

Energy: In Mogadishu, three private companies – Becco, Mogadishu Power and Blue Sky Energy – supply electricity, with rates among the highest globally. It is estimated that the annual energy consumption of Somalia is 4 million tonnes of locally sourced firewood, which meets up to 90% of energy needs.¹² Solar energy adoption remains minimal.

Who owns Mogadishu electricity?

Before the state collapse in 1991, Mogadishu's existing infrastructure was largely destroyed. Today, the sector is mainly controlled by private individuals and their companies (Energy Catalyst, 2020), who have made significant investments. Hormuud's investment in BECO Company has made it the country's largest electricity provider.

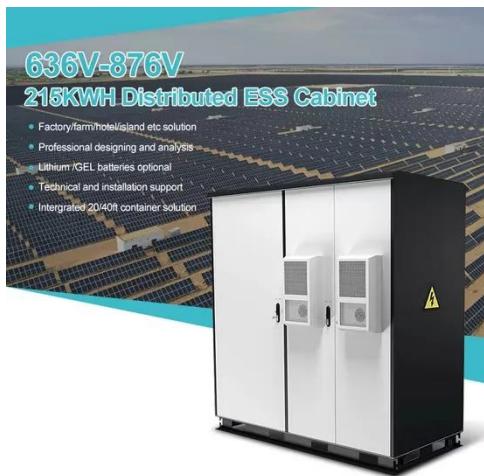

How do we understand urban development in Mogadishu?

To understand urban development and prospects for developmental reform in Mogadishu, we need to understand who wields power and how they use it. City-level power dynamics do not exist in a vacuum; they are typically influenced by what we call the country's “political settlement”.

How do systems work in Mogadishu?

This means that systems tend to allocate goods and services unevenly, and may be used to extract benefits and secure political advantage. The primary systems operational in Mogadishu include water, energy, waste management, sanitation, education, healthcare, food distribution, transportation, finance, and law and order.
