Is it easy to install a 25kW solar container

Overview

Do I need a 25kW Solar System?

Whether or not you need a 25kW solar system will depend on many things. If you are a Commercial customer and you use between 98.5kWhs and 151kWhs then a 25kW solar system could be a good choice to help reduce power bill costs. Solar Proof Quotes offer a quick and easy way to get 25kW solar system quotes.

How big is a 25kW solar power system?

A 25kW system using 370W panels will require about 119.3 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 25kW solar power systems are mostly suitable for SMEs with medium energy needs. This size of solar power system is classed as "Commercial".

How much space does a 30kW Solar Kit require?

A 30kW Solar Kit can require over 1,725 square feet of space. These are complete PV power systems that can work for a home or business, with everything you need to get the system up and running.

Can I install a 30kW Solar System for my home?

You can install a 30kW solar system for your home if you can harness the amount of power it generates. Though, for this, your roof space must be large. Talking about it's payback time- A good quality 30kW system will deliver a full return on investment (ROI) within 3 to 6 years.
