# **Is solar container outdoor power safe to use in Bhutan**

## Overview

---

What is a solar project in Bhutan?

**Project Goals and Approach to Transformational Change:** The project aims to install 30 MW of solar PV and strengthen the regulatory environment to accelerate Bhutan's renewable energy market, fully realising its solar energy plan of 1000 MW as planned by the government in the current five-year plan (2024-2028).

Why is Bhutan a carbon-negative country?

**Introduction and Background:** Bhutan, a carbon-negative country, faces a growing threat to its environment due to climate change. Accelerated glacial melt and unpredictable river flows are impacting hydropower generation, the country's primary energy source.

What is Bhutan's re master plan (2017-2032)?

Bhutan's RE Master Plan (2017-2032) identifies 39,462 MW of potential small hydropower, solar, and wind projects, underscoring the country's commitment to clean energy. The project directly supports the implementation of this Master Plan. **Project Goals and Approach to Transformational Change:**
