**Is there any power station
generator for sale in Iceland**

Overview

How many power stations are there in Iceland?

We operate fourteen hydropower stations, three geothermal power stations and two wind turbines for research purposes in five operating areas in Iceland. In operating power stations, emphasis is placed on a holistic vision, where prudence, reliability and harmony of the operations with environment and society are the guiding principles.

What is the largest power station in Iceland?

The largest hydroelectric power station in Iceland is Kárahnjúkar Hydropower Plant. It generates electricity in the north Vatnajökull area, which is needed for aluminum production.

Who runs the hydroelectric power station in Iceland?

Historically, all the hydroelectric power stations in Iceland are run by Landsvirkjun, the National Power Company of Iceland. Currently, the largest power station is Kárahnjúkar Hydropower Plant, which generates electricity in the north Vatnajökull area for aluminum production.

What makes Landsvirkjun a good power station?

In operating power stations, emphasis is placed on a holistic vision, where prudence, reliability and harmony of the operations with environment and society are the guiding principles. Landsvirkjun is the National Power Company of Iceland. We produce electricity from renewable energy sources; hydropower, geothermal energy, and wind.
