Kenya container ship generator communication power supply

Overview

How do shore power and ships generators work?

At this point the shore power and ships generators are operating in parallel. Once operating in parallel, the ships diesel generators are slowly and automatically unloaded causing the ships electrical load to be transferred from the diesel generators to the shore power supply in a controlled manner.

How do you Power a ship if you're in Port?

Take electricity from shore to ship when in port instead of using on-board engines for power generation. Use alternative maritime power (AMP) for your ship: take power from the shore grid instead of running the ship's onboard engines.

What's going on in container and passenger ports?

Ships arriving and departing, containers and merchandise being loaded and unloaded, countless people on the job: there's always a lot going on in container and passenger ports. Our solutions let you reliably supply power to container ships and terminals, large passenger ships, yachts, and boats of all sizes.
