# **Korean Energy Storage Power Station**

## Overview

---

Korea Electric Power Corp. (KEPCO) has officially finished construction works on a massive battery energy storage project in the city of Miryang, in Gyeongsangnam-do Province. Will South Korea install 540 megawatts of battery energy storage systems?

The Ministry of Trade, Industry and Energy unveiled plans for a nationwide tender to install 540 megawatts of battery energy storage systems (BESS), marking the country's first major government-led deployment of its kind. The project is part of a broader effort to modernize South Korea's power grid and support the transition to renewable energy.

What is Gyeongsan substation - battery energy storage system?

The Gyeongsan Substation - Battery Energy Storage System is a 48,000kW lithium-ion battery energy storage project located in Jillyang-eup, North Gyeongsang, South Korea. The rated storage capacity of the project is 12,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology.

Why is South Korea launching a 540mw battery energy storage tender?

South Korea is ramping up its battery energy storage deployment with a new 540MW tender to stabilize the grid and support renewable energy growth. Learn how this move strengthens both domestic resilience and global market leadership.

Is KEPCO Asia's largest battery energy storage system?

Korean utility KEPCO completed a 978 MW battery project that is billed as Asia's largest battery energy storage system for grid stabilization purposes. From ESS News
