Latest news on CRRC s energy storage project in Ottawa

Overview

A proposed 250-megawatt battery storage installation in Ottawa's rural west won a resounding vote of confidence Wednesday as Ottawa City Council approved a municipal support resolution (MSR) for the project on a 20-3 vote. Could a battery energy storage site be in Ottawa's West End?

With files from CTV News Ottawa's Kimberley Fowler A proposed battery energy storage site in the city's rural west end was at the center of discussion during an open house on Sunday, with concerned residents coming to heads with the company spearheading the project.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

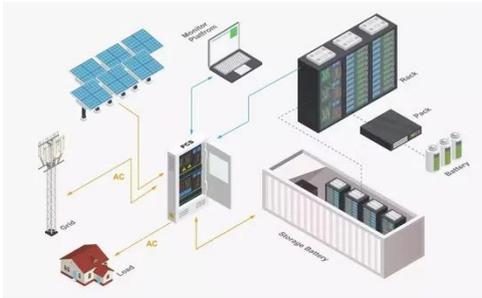

What is the Crimson energy storage project?

The Crimson Energy Storage Project, solar power. More: Original public domain image from Flickr A proposed 250-megawatt battery storage installation in Ottawa's rural west won a resounding vote of confidence Wednesday as Ottawa City Council approved a municipal support resolution (MSR) for the project on a 20-3 vote.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:
