# Latest solar panel models and prices

## Overview

---

Find prices for solar panels and compare technical specifications of various brands and models of modules in our regularly updated solar panel comparison table. How much does a solar panel installation cost?

The best way to evaluate the price of a solar panel installation is in dollars per watt (\$/W). Similar to comparing dollars per square foot when shopping for a home, \$/W helps standardize the cost of solar by showing the cost of solar on a per watt basis. Currently, the average price of a solar panel system install in the U.S. is \$2.91/W.

What is residential solar PV?

Residential solar PV refers to home solar power systems that generate electricity using photovoltaic (PV) panels. The solar price for residential installations depends on factors like system size, installation costs, location, and available incentives.

Do solar panel prices include GST?

Solar panel prices indicated are our best estimate of retail pricing, including GST, based on available information unless specifically noted otherwise. Warranty information was current when the model was added — always check with the manufacturer for the latest warranty information.

What are the different types of solar panels?

Solar panels are generally broken into two groups by cell type: monocrystalline and polycrystalline. While there are other types of solar technologies that exist (like thin-film cells), the majority of photovoltaic solar panels available for installation are either monocrystalline or polycrystalline, and are made out of silicon.
