

Libya energy storage demand reduced

Overview

How much energy does Libya need in 2022?

Fossil fuels met nearly all of Libya's energy demand, with oil accounting for 57% and natural gas accounting for almost 43% in 2022. Rooftop solar projects met less than 1% of the remaining energy demand.¹⁵

What is happening in Libya's fossil fuel sector?

Though since 2011, the fossil fuel sector of Libya has been severely impaired by the civil war and has not yet quite recovered, and rising energy demand in the domestic sector is leading to increased blackouts. Libya's economy is highly related to fossil fuels and oil and gas account for 96% of total government revenue.

Is Libya achieving sustainable economic sustainability goals?

The Libyan government is actively working towards achieving sustainable economic sustainability goals. The adoption of renewable energy will not only help reduce carbon dioxide (Salih, 2014). A rapid and radical shift towards a sustainable global energy system is currently taking place.

Why does Libya need an energy transition?

The global oil and gas industry creates jobs for millions. The Libyan energy sector employs a lot of Libyans therefore, the need for this energy transition to account for the jobs that would be lost when the industry is in decline.
