Lithium power station factory in Ethiopia

Overview

Ethiopia partners with Battswap Automotive to launch its first electric vehicle factory in Addis Ababa, leveraging local lithium and cobalt reserves and renewable energy to build a sustainable EV ecosystem in East Africa. Where is lithium found in Ethiopia?

In Ethiopia lithium minerals (lepidolite, spodumene) are found together with tantalite in the Kenticha pegmatite deposit (Tadesse, 2001). No economic extraction of lithium exists in Ethiopia at the moment; the pegmatite deposit is only mined for niobite/tantalite.

Are there power stations in Ethiopia?

This page lists power stations in Ethiopia, both integrated with the national power grid but also isolated ones. Due to the quickly developing demand for electricity in Ethiopia, operational power plants are listed as well as those under construction and also proposed ones likely to be built within a number of years.

Will Kenticha mining become the first producer of lithium in East Africa?

Kenticha Mining (KMPLC) is poised to become the first producer of lithium in East Africa, with production scheduled to commence within the next three months. The company has already invested Birr 80 billion in the project, which is anticipated to generate 1,000 job opportunities.

How many tons of lithium can a kmplc plant produce?

The plant is expected to arrive in Ethiopia in September and will have a production capacity of 270 tons of lithium per hour. KMPLC has already entered into an agreement with a Saudi Arabian company to supply lithium products, and discussions are underway with other potential buyers.
