

**BLINK SOLAR**

# **London 5m Solar Electric System**

## Overview

---

What is the London solar opportunity map?

The London Solar Opportunity Map is based on the interpretation of LiDAR data (where laser technology is used to measure distances) collected and made available by the Environment Agency. It provides an initial estimate of the amount of electricity that could be generated from panels both on rooftops and at ground level.

How many homes in London have solar panels?

56,739 homes in London have had solar panel installations certified by the Microgeneration Certification Scheme (MCS), as of June 2025. Across the capital's 32 boroughs and the City of London, that means 1.7% of all households have installed solar panels.

Which London boroughs have solar panels?

Across the capital's 32 boroughs and the City of London, that means 1.7% of all households have installed solar panels. The best-performing borough is Havering, where 3.12% of homes have gone solar, just ahead of neighbouring Barking and Dagenham.

Do solar panels work in London?

London receives more sunlight than most areas of the UK. Solar panels only require daylight to work, but they do produce more electricity under direct sunlight – which is why it's great news for solar homes that the capital is relatively sunny. It varies across the city, though.
