London Assembled Outdoor Power Plant

GRADE A BATTERY

LiFePO₄ battery will not burn when overcharged, over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

What is a hidden London power plant?

How a hidden London power plant. Hidden deep underground, nestled beneath one of London's most innovative business districts, lies a CHP (combined heat and power) plant with a rich and fascinating history –and it is leading the way towards a greener future for the United Kingdom's energy market.

Does London have a power plant?

Within the heart of London, a huge power plant operates underground. Since 1992, this power plant has supplied power to some of the City's large public buildings. It is part of a joint energy project for efficient and inexpensive energy production and enables carbon savings of up to 5,000 t/year.

When will Apple's London power station open?

The Power Station was the second phase to open to the public on the 14th October 2022. This truly mixed-use building is home to Apple's London Campus, hundreds of new shops housed in the historic turbines halls, a state-of-the-art dolby cinema, a 24,000 sq ft food hall, a glass chimney lift and hundreds of new homes.
