London Energy Storage Cabinet solar container lithium battery Warranty

Overview

What is a lithium ion battery storage cabinet?

Our Lithium Ion Battery Storage Cabinet LBSC-A10 is designed for secure storage of lithium-ion batteries in labs, workshops, and small industrial units, offering fireproof protection in compact spaces. Labtron Lithium Ion Battery Storage Cabinets are engineered for secure storage and controlled battery charging environments.

Why are lithium-ion batteries excluded from long duration energy storage (LDEs)?

The government's recent exclusion of lithium-ion from its Long Duration Energy Storage (LDES) support scheme signals stricter quality controls ahead. Imagine storing miniature power plants in your warehouse - that's essentially what lithium-ion batteries are.

Why is battery storage so important in the UK?

According to Solar Energy UK, battery storage is crucial to unlocking the full potential of solar power and enabling the UK to meet its net zero targets. Investment and deployment in this sector are booming. As of early 2025, over 90GW of battery storage capacity is in the UK pipeline, with more than 4.5GW already operational.

Should lithium-ion battery storage installations be protected during a fire?

At the same time, concerns around fire safety — particularly lithium-ion battery fires — are prompting calls for national safety standards. In this article, we explore why protecting battery storage installations is critical not just during operation, but from the moment ground is broken.
