Manila 2025 New Energy Storage Station Subsidy

Overview

How many MW of renewable power will the Philippines have in Q1 2025?

The Philippines committed to nearly 7,000 MW of new renewable capacity in Q1 2025, dominated by solar and wind projects.

How many megawatts will the Philippines have by 2025?

The Department of Energy (DOE) projects 5,632 megawatts (MW) of new power capacity to come online in the Philippines by the end of 2025, with renewable energy sources driving the majority, according to data published on March 31.

How much solar power will Mindanao have in 2026?

Mindanao anticipates 232 MW, with renewables like solar leading the mix. Nationwide, the DOE projects 19,190 MW of committed capacity from 2025 to 2030, with 5,998 MW expected in 2026 and additional projects through 2030. The focus on solar and wind highlights the Philippines' shift toward sustainable energy.

How many hydropower projects are there in the Philippines?

Based on a document released by the DOE, there are three pumped-storage hydropower projects, one hydropower project, five wind projects, one coal project, and one battery energy storage system (BESS) project endorsed to the National Grid Corporation of the Philippines (NGCP) at the start of 2025.
